Yorkshire Water Services Limited

Update following CMA appeal and downgrade of Class A bonds to Baa2

Summary

The credit quality of [Yorkshire Water Services Limited](#) (Yorkshire Water) is supported by: (1) the company's low business risk as a monopoly provider of essential water and sewerage services; (2) its relatively stable cash flow generated under a well-established and transparent regulatory regime; and (3) creditor protections incorporated within the company's financing structure. The company's credit quality is constrained by its high leverage, around 77% of regulatory capital value (RCV) as of 31 March 2019. In addition to its outright borrowings, Yorkshire Water has entered into £1.8 billion notional value of derivatives with a negative mark-to-market (MTM) value of over £2.6 billion as of January 2020, equivalent to 37% of RCV, reflecting embedded funding costs significantly above current market rates.

The rating is also constrained by the likelihood of significantly weaker interest coverage over the 2020-25 regulatory period (AMP7). Ofwat published its final determination for AMP7 in December 2019, but the company has appealed the decision to the Competition and Markets Authority (CMA). The CMA's redetermination, expected by late 2020, may result in higher or lower allowed revenue. On 13 March 2020, we confirmed the Baa2 CFR with a negative outlook. Concurrently, we downgraded the senior secured rating on the Class A bonds to Baa2 from Baa1, reflecting the persistently high and growing MTM on the derivatives portfolio, which would rank ahead of senior debt in a default scenario where creditors demand payment acceleration.

Exhibit 1

Interest coverage is likely to weaken during AMP7 Moody's Adjusted Interest Cover Ratio (AICR) and projected range

Moody's Projections (proj.) are Moody's opinion and do not represent the views of the issuer.

Sources: Moody's Investors Service

Credit strengths

- » Stable cash flow generated from the provision of monopoly water and wastewater services
- » Well-established, transparent and predictable regulatory regime
- » Debt structural features, including distribution lock-up covenants, dedicated liquidity, intercreditor agreement and security arrangements, which reduce event risk and enhance resilience in downside scenarios

Credit challenges

- » High cost of debt under long-dated embedded debt and derivatives portfolios
- » Very large mark-to-market derivatives liability that would rank ahead of senior creditors in an event of default, if creditors demand payment acceleration
- » Recent derivative restructurings mean dividend lock-ups and other creditor protections are less likely to be triggered
- » Financing structure allows high gearing, up to 85% net debt/RCV

Rating outlook

The negative outlook reflects credit metrics that are weakly positioned for the assigned rating, based on Ofwat's final determination. However, the AICR could improve if the company receives a more favourable determination from the CMA or if it is able to significantly outperform its cost allowances.

Factors that could lead to an upgrade

We currently do not envisage any upward rating pressure. The outlook could be stabilised if Yorkshire Water receives a more favourable outcome from the CMA, if it achieves strong outperformance or if it demonstrates the ability and willingness to take measures to strengthen its balance sheet.

Factors that could lead to a downgrade

The rating could be downgraded if, taking into account the CMA redetermination and any measures that management may implement, Yorkshire Water appears unlikely to achieve an AICR of around 1.3x while maintaining gearing, measured by net debt to RCV, not materially above 80%.

In addition, downward rating pressure could result from (1) adoption of a more aggressive financial policy, (2) a significant increase in business risk for the sector as a result of legal and/or regulatory changes leading to a reduction in the stability and predictability of regulatory earnings, which in each case are not offset by other credit-strengthening measures or (3) unforeseen funding difficulties.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

Source: Moody's Financial Metrics™

Moody's projections are Moody's opinion and do not represent the view of the issuer. Projections for 2021 assume that the company's expenditure is in line with Ofwat's final determination allowances.

The previous credit opinion, published in January 2020, showed AICRs of 1.5x and 1.6x in Mar-18 and Mar-19, respectively, because we incorrectly included certain swap receipts as an increase in funds from operations. See "Swap restructurings create difference between Moody's and covenant AICRs" for a discussion of the relevant inflows.

Profile

Yorkshire Water Services Limited (Yorkshire Water) is the fifth largest of the 10 water and sewerage companies in England and Wales by both RCV and the number of customers served. Yorkshire Water provides drinking water to around 5 million people and around 130,000 local businesses over an area of around 14,700 square kilometres encompassing the former county of Yorkshire and part of North Derbyshire in Northern England.

Kelda Group Limited, the parent company of the Yorkshire Water group, is ultimately owned by GIC Special Investments Pte Limited, the private equity investment arm of the Government of Singapore; Corsair Capital LLC, as investment adviser for a number of infrastructure investment funds; Deutsche Asset Management's infrastructure investment arm, as fund manager for a number of investment funds; and SAS Trustee Corporation, the trustee of certain New South Wales public-sector superannuation schemes.

Detailed credit considerations

Ofwat set a challenging final determination for 2020-25 period

Ofwat's final determination, which Yorkshire Water has appealed, included a significant cut in allowed cash returns to 2.42% at the start of the new period, which incorporates the regulator's decision to link half of the regulatory assets to the Consumer Prices Index adjusted for housing costs (CPIH), with the rest remaining linked to the Retail Prices Index (RPI). As the share of regulatory assets linked to CPIH grows over time, we estimate that Yorkshire Water would have an average allowed cash return of around 2.50% over AMP7. On an RPI-stripped basis, for comparison with the current period, allowed returns will fall to 1.92% for wholesale activities (1.96% including retail margin) from 3.6% (3.74% including the retail margin), a nearly 50% cut.

Exhibit 5

Significant cut in allowed returns, despite lower inflation index Real (cash) allowed returns

Source: Ofwat

Exhibit 6

Unprecedented cut in nominal allowed returns Nominal (total) returns including forecast inflation of RCV

Note: Assuming ex ante expectation of 3% RPI inflation and 2% CPI inflation
Source: Ofwat, Moody's Investors Service estimates

Ofwat's allowance for "base" totex expenditure, excluding enhancement projects but including retail costs, was £3.5 billion. Although this is roughly £280 million less than requested in Yorkshire Water's April 2019 business plan, it is only £90 million less than the lower-cost plan that the company proposed following draft determinations in the hope of securing a "workable compromise" with Ofwat (all figures based on Ofwat's presentation of the company's plans, following reallocations). In its representations, the company acknowledged that the revised plan carries higher risk of overspending and/or higher ODI penalties. Nonetheless, we recognise that Yorkshire Water may be able to defer or avoid expenditure to further reduce or eliminate totex overspend during the period. Under the totex sharing mechanism, 33-38% of any overspend would be added to the RCV in 2025 or recovered over the 2025-30 period.

Yorkshire Water has appealed its determination, extending uncertainty

Ofwat is required under the Water Industry Act to "refer" its final determination to the CMA if a company asks it to do so. Yorkshire Water announced on 10 February 2020 that it had appealed¹, stating that the final determination creates long term risks to resilience and to its customers which it Yorkshire Water cannot accept. Northumbrian Water, Anglian Water and Bristol Water have also appealed their determinations.

The CMA is required to reach a decision within six months of receiving a reference, unless it requests a single extension of up to six months and Ofwat is satisfied that there are "special reasons" why the referral cannot be resolved within the original period. In a letter sent to companies, the CMA said that it would try to complete its work within the six-month deadline, but that it recognised an extension could be needed.

The CMA typically publishes provisional findings for public consultation, although it is not required to do so and chose not to in its review of Ofgem's electricity distribution price determinations in 2015.

Exhibit 7

Estimated timetable of CMA appeals process

	Date	Source

*Estimated based on most recent precedent redetermination

Sources: Ofwat, Competition and Markets Authority and Moody's Investors Service

A CMA decision takes the form of a full redetermination that can, at least in theory, reconsider any aspect of Ofwat's methodology. The CMA may allow a higher or lower return, and may increase or reduce cost allowances. Even if the CMA arrives at a different conclusion from Ofwat, the final determination will still apply until March 2021.

An important precedent will be the CMA's decision on the cost of capital for the UK air traffic control provider, [NATS \(En Route\) PLC](#) (NERL, A2 negative) (see [NERL: Likely CMA referral prolongs regulatory uncertainty](#), 20 September 2019). Several water companies jointly submitted evidence on the cost of capital to the CMA as "interested parties" in this case.² The CMA expects to announce provisional findings in the NERL case in early or mid-March 2020, with a final decision no later than 18 May.

Operational performance track record supports credit quality

Yorkshire Water has historically been a strong operational performer, and Ofwat assessed it to be an "average" performer in 2018-19.³

The company generally performed well under Ofwat's key performance indicators in AMP6, with 21 of its 26 performance commitments delivered during the year. The company accrued £8.8 million in net rewards in 2018-19 (in 2012-13 prices), taking the company's cumulative reward over AMP6 to £36.0 million over the first four years. The company forecasts that it will earn £60 million net rewards in total over the AMP.

Exhibit 8

Yorkshire Water's SIM performance is in line with the sector average**Service Incentive Mechanism score**

Sources: Ofwat, companies' reports, Moody's Investors Service

For the five performance commitments that were below target, Yorkshire Water only accrued a penalty for the number of contacts due to drinking water quality. While the company has continued to reduced the annual number of contacts, the 7,964 calls during 2018-19 still remained above the target of 6,108 calls annually.

Yorkshire Water's wholesale totex, which includes capital and operating expenditure, has been in line with regulatory allowances over the first four years of the period. However, the company says that this is due to £260 million of discretionary "reinvestment", and that it has outperformed allowances on an underlying basis.

Exhibit 9

Overall expenditure is in line with allowances

Sources: Companies' performance reports, Ofwat, Moody's Investors Service

High borrowing costs and fair value leverage

Yorkshire Water has relatively high leverage, 77% of RCV, and a high average financing cost, which we estimate will be around 5.2% over AMP7 if the company maintains constant gearing, compared to a regulatory allowance of around 4.1%, both in nominal terms. In combination with the lower allowed return in AMP7, this will put pressure on Yorkshire Water's interest coverage metrics.

The company's high borrowing costs are largely a result of inflation swaps entered into at the time of its acquisition in 2008, many of which extend to the mid-2040s or beyond. Under these swaps, Yorkshire Water receives an amount linked to Libor and pays a fixed coupon, while accruing an amount linked to the Retail Prices Index that must be paid to the counterparty at fixed intervals or at maturity of the swap, depending on the instrument.

As interest rates have fallen, current and anticipated receipts under these swaps have declined while payments have remained constant. As a result, current net financing costs are higher and the discounted value of expected future cash flow has become increasingly negative. As of January 2020 the mark-to-market loss on these swaps (MTM) is approximately £2.6 billion (37% of Regulatory Capital Value).

Taking into account the fair value of existing borrowings as well as derivatives, we estimate that Yorkshire Water had gearing of over 130% of RCV as of March 2019. Although erosion of equity value could weaken incentives for shareholders to provide further funding to support the business, Moody's notes, as positives, Yorkshire Water's decision to limit dividends during AMP7 and the recent refinancing of debt at Yorkshire Water's holding company.

Swap restructurings create persistent difference between Moody's and covenant AICRs

In December 2017 and July 2018, Yorkshire Water restructured several of its swaps so that it will receive an additional amount of around £30 million from counterparties in each year of AMP7, with further inflows in AMP8. In exchange, the maturity of these out-of-the-money swaps was extended so that Yorkshire will make additional cash payments in the 2030s and 2040s equivalent, on the basis of current market interest rates, to the amount received plus an implied funding cost.

Yorkshire accounts for these cash receipts as interest received in the income statement. The restructurings therefore reduce Yorkshire Water's reported net interest expense and increase the Adjusted ICR under the company's covenant, by around 0.2x in each year of AMP7. The anticipated future outflows are reflected as a fair value charge and increase in the derivative liability on the balance sheet.

Because derivative financial liabilities are not included in the covenant definition of net indebtedness, the restructurings will also modestly improve the company's Senior RAR over time.

In our view, the effect of the swap restructuring is economically equivalent to new borrowing, because the company receives cash inflows in the current period that are offset by highly likely future outflows. As a result, we exclude the receipts associated with these swap restructurings from interest, which reduces Moody's AICR compared to the company's covenant calculation by around 0.2x. Although we do not adjust debt to reflect cumulative swap receipts, we continue to consider leverage including the swap MTM in our assessment of credit quality.

The swap restructurings improve Yorkshire Water's liquidity during AMP7 and AMP8, a credit positive. However, we regard the restructurings as modestly negative for the company's credit quality because they mean the Adjusted ICR covenant will protect a weaker Moody's AICR.

Swap MTM could reduce recovery rates for senior creditors

In a default scenario, if creditors demand payment acceleration, the company would be required to make a termination payment based on swap counterparties' assessment of their total losses, which is likely to be close to the MTM at that time. This payment would rank ahead of principal and interest on senior debt and would, at current levels, materially reduce senior debt recovery.

Yorkshire Water's intercreditor arrangements contain provisions intended to reduce the likelihood of an event of default and, if one were to occur, to allow resolution before enforcement action. In particular, an automatic standstill of up to 18 months follows the occurrence of an event of default (resulting from, for example, non-payment of scheduled payments, maintaining forward-looking liquidity of less than six months, violation of licence terms, rating downgrades from multiple agencies or breach of default financial ratios). The standstill is designed to allow time for secured creditors to pursue options that could include a sale of the regulated business. During the standstill period, no other enforcement of creditor's rights is allowed, including payment acceleration that would trigger termination payments to swap counterparties.

Liquidity analysis

Yorkshire Water exhibits a solid liquidity profile, with its stable and predictable cash flow generated by its regulated activity, cash balances of around £18 million as of 30 September 2019 (excluding restricted cash for swap collateral purposes) and access to £560 million committed bank facilities to cover capex and working capital needs, of which £335 million was drawn as of 30 September 2019.

In addition, under its financing structure, Yorkshire Water has access to a £170 million debt service reserve liquidity facility and a £90 million operation and maintenance liquidity facility. Both facilities are renewed annually and sized to cover projected needs over the next 12 months.

Structural considerations

The Baa2 CFR is assigned to Yorkshire Water as if it had a single class of debt and were a single consolidated legal entity, and reflects our opinion on the expected loss associated with the financial obligations within the Yorkshire Water group. The CFR consolidates the legal and financial obligations of Yorkshire Water, its financing subsidiaries Yorkshire Water Finance plc and Yorkshire Water Services Finance Limited, and the intermediate holding company (Yorkshire Water Services Holdings Limited) within the ring-fenced group. The rating also factors in the credit enhancements of the financing structure.

Debt structural features provide rating uplift for additional creditor protection

Yorkshire Water's CFR also takes into account the covenant and security package agreed by the company, which is designed to insulate the company's creditworthiness from that of its ultimate shareholders and improve creditors' protection in a default scenario. The overall covenant and security package is similar to that of comparable highly leveraged financing transactions.

Additional event risk protection provided by the bond covenant and security package includes, inter alia, restrictions on acquisitions and disposals (subject to limited defined exceptions), a dividend lock-up coming into effect if senior gearing increases above 85% of RCV or senior adjusted interest coverage falls persistently below 1.2x (both calculated under the company's covenant definitions), and limitations on non-core activities. In addition, we consider creditor step-in rights if certain trigger events occur.

In 2015, the highly leveraged UK water companies, including Yorkshire Water, introduced a new supplementary interest cover covenant, designed to reflect regulatory changes in the revenue building block approach for tariff-setting purposes. The definition of Yorkshire Water's supplementary covenant is slightly different from that of its highly leveraged peers. Whereas Anglian Water's or Thames Water's supplementary covenant replaces the previous regulatory capital charges (infrastructure renewals charge and current cost depreciation) with the new RCV depreciation under Ofwat's totex approach, Yorkshire Water also deducts the funded portion of infrastructure renewal expenditure not included in opex in its statutory financial statements, as well as a "fast/slow adjustment" that would reverse excess revenue allowances compared with expected cost assumptions at the final determination. We believe that Yorkshire Water's supplementary covenant most closely resembles the creditor protection that was intended with the original interest cover covenant.

Recovery prospects in a default scenario can be improved by (1) a first-ranking fixed charge over the shares in the company, plus first-ranking fixed and floating charges over all the assets, rights and undertakings of Yorkshire Water; and (2) the agreement by financial creditors to give up their individual rights to petition for insolvency proceedings. We recognise that the benefit of the security provided to bondholders is limited because of the regulated and essential nature of the services provided by Yorkshire Water as governed by its licence and the Water Industry Act 1991.

Class A notes rated in line with the CFR

We also rate the bonds issued by Yorkshire Water's finance subsidiary under an £8.0 billion multicurrency bond programme (the programme), guaranteed by Yorkshire Water. The bonds are issued either as part of a senior tranche (Class A debt) or a junior tranche (Class B debt), and are currently rated Baa2 or Ba1, respectively.

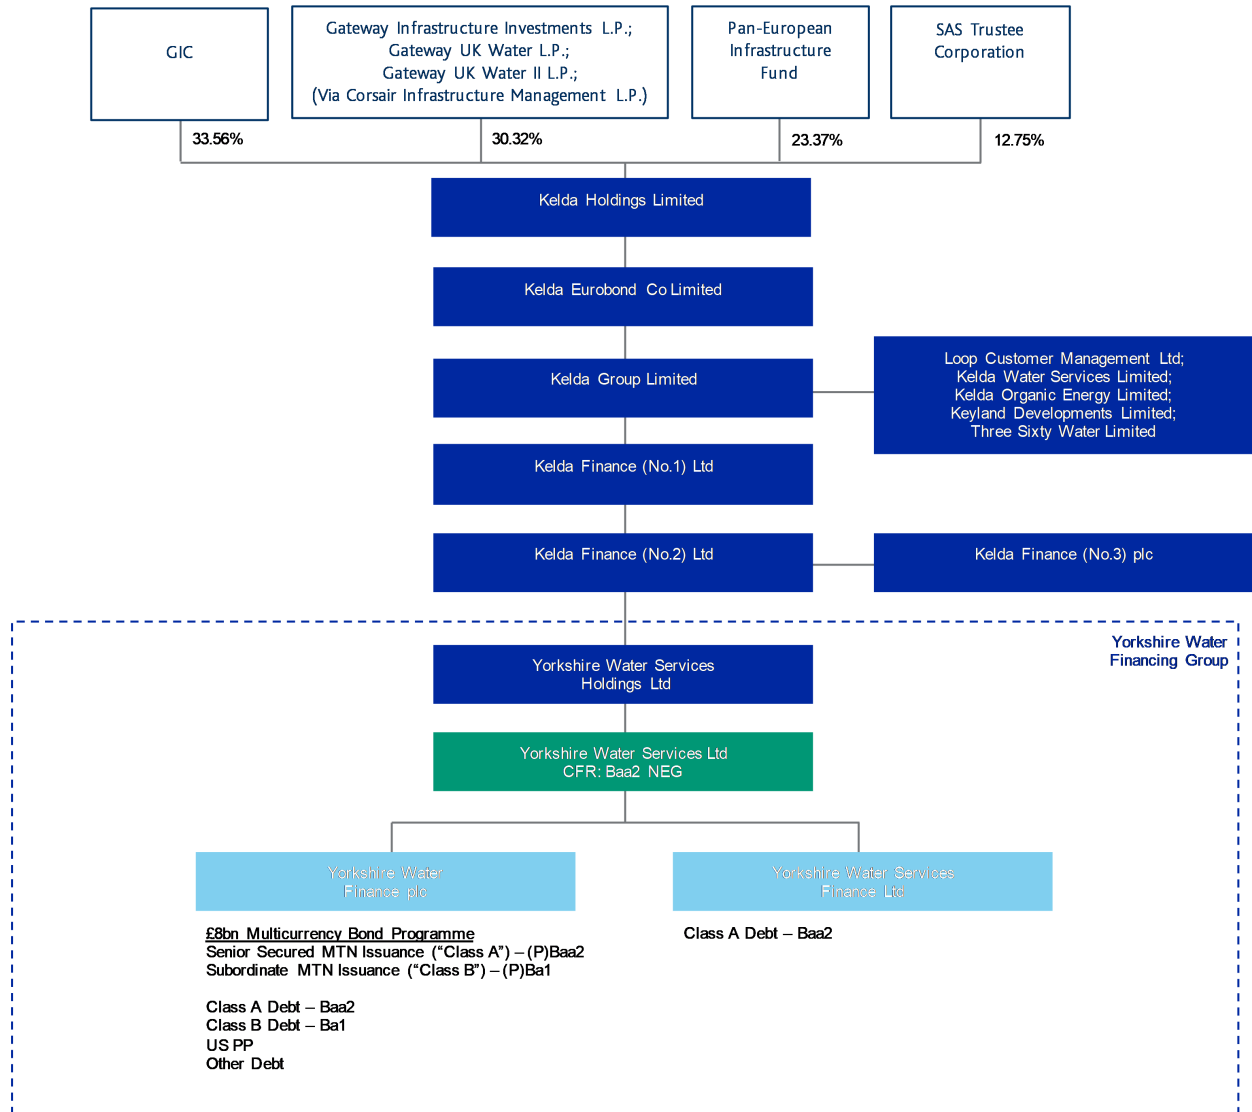

The Class A rating reflects the debt protection measures for this class of bonds and other pari passu indebtedness and its senior position in the cash waterfall and ahead of Class B debt post any enforcement of security. For other issuers with a similar structure, such as [Anglian Water Services Ltd.](#) (CFR Baa1, Class A A3, negative outlook) and [Thames Water Utilities Ltd.](#) (CFR Baa1, Class A A3, under review for downgrade), these considerations support a rating for the Class A debt that is one notch higher than the CFR.

However, in a default scenario, if creditors demand payment acceleration, Yorkshire Water would be required to make a termination payment based on swap counterparties' assessment of their total losses, which is likely to be close to the MTM at that time. This payment would rank ahead of principal and interest on senior debt and would reduce Class A debt recovery. Given the large size of Yorkshire Water's swap MTM, we rate the company's Class A debt in line with the CFR.

The Ba1 rating of the Class B bonds reflects the same default probability as factored into the Baa2 CFR, as well as our expectation of a heightened loss severity for the Class B debt following any default, given its subordinated position.

MOODY'S INVESTORS SERVICE DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S INVESTORS SERVICE CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER. ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$2,700,000. MCO and Moody's investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY250,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
